

Building the Future: Careers in the Prince Rupert Middle School Construction Project

Your opportunity to build closer to home while shaping the future of education in Prince Rupert. This major construction project represents more than just a building—it's an investment in our community's future and your career growth.

Why Work on This Project?

The Prince Rupert Middle School construction project offers exceptional opportunities for local workers and tradespeople. This is your chance to contribute to a meaningful community landmark while advancing your construction career.

Key Benefits

- **Build closer to home** with local workers given hiring preference
- **Support the local community** and Indigenous peoples through inclusive employment practices
- **Work in safe, inclusive environments** that prioritize respect and professionalism
- **Access training and apprenticeships** in various construction trades
- **Gain valuable experience** on a major educational infrastructure project

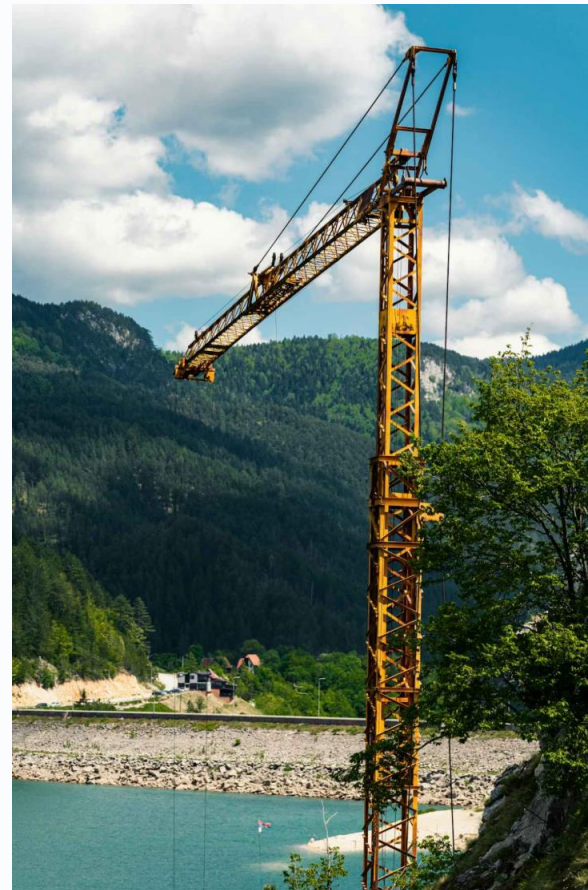

This project prioritizes creating pathways to skilled careers while strengthening our local workforce. Whether you're an experienced tradesperson or looking to start your career, there's a place for you here.

Who's Hiring? Key Employers & Partners

The Prince Rupert Middle School project brings together a consortium of leading construction companies and specialty contractors. Yellowridge Construction serves as the general contractor, coordinating a network of experienced subcontractors across multiple trades.

This collaborative approach creates diverse employment opportunities across various specializations—from excavation and steel work to electrical systems and mechanical installations. Each contractor brings expertise, training resources, and commitment to workforce development.

The following pages provide detailed information about each hiring company, including specific roles available, required skills, scope of work, and direct contact information for applications.

Project Contractors Directory

Below is the complete list of contractors currently hiring for the Prince Rupert Middle School project. Each company specializes in different aspects of construction, offering opportunities across multiple trades and skill levels.

Contact: Jamie Storey at justdig@citywest.ca or call 250-627-6844

Nucar Reinforcing Steel

Reinforcing Steel Specialists

Nucar is a national leader in supplying, fabricating, and placing reinforcing steel for major infrastructure and commercial construction projects. They offer multiple career paths in the reinforcing steel trade.

Ironworker Apprentice

Place and secure reinforcing steel bars (rebar) on construction sites according to blueprints and engineering specifications.

Skills: Physically fit, safety-conscious, ability to read drawings (training provided), willingness to join union apprenticeship program.

Shop Labourer

Cut, bend, bundle, and tag rebar in fabrication shop using machines and hand tools.

Skills: Mechanically inclined, able to lift 50+ lbs, forklift or crane experience an asset.

Rebar Detailer

Interpret construction drawings and generate detailed rebar placement drawings and bar lists using CAD software.

Skills: Technical diploma in drafting/design (civil, architectural, or structural), attention to detail, computer literacy.

 **Contact:** Melanie Coffey at melanie.coffey@nucor.com

Whitemud Ironworks

Structural Steel & Welding

Currently Hiring

- **Structural Ironworker**
- **Welder**

Whitemud Ironworks is seeking skilled professionals to work on structural steel and glulam installations for the Prince Rupert Middle School project. This is an excellent opportunity for experienced ironworkers and welders to apply their expertise on a significant educational facility.

Scope of Work

- Structural steel detailing
- Engineering support
- Metal fabrication
- Steel erection and installation
- Glulam beam erection
- Structural welding

Contact: Leah Nolan at lnolan@wiworks.ca or call 780-702-5869

Western Archrib

Glue Lams & Structural Timber

Currently Hiring

Skilled labor, apprentice carpenters, pipe layers, and truck drivers (Class 5 with air endorsement)

Scope of Work

Excavation, utility infrastructure, concrete work, site preparation, reclamation, and general construction activities

Western Archrib specializes in engineered timber systems and glulam installation. This contractor plays a crucial role in the structural elements of the Prince Rupert Middle School, working with advanced wood construction techniques and modern engineered lumber products.

Positions offer hands-on experience with cutting-edge timber construction methods, providing valuable skills that are increasingly in demand as sustainable building practices become standard in the construction industry.

 **Contact:** For application information, please reach out to Yellowridge Construction at careers@yellowridge.ca with "PRMS - Western Archrib" in the subject line.

Pinnacle Electric

Electrical Systems Installation

Currently Hiring

- **Apprentice Electricians** (all levels)
- **Journeyman Electricians**

Skills & Assets

- Skilled in electrical work
- Level 1 first aid certification
- Self-motivated and reliable
- Efficient and diligent work ethic
- Strong attention to detail

Scope of Work

- Complete electrical systems installations
- Installing EMT conduits
- Wiring and fixtures
- Power distribution systems
- Lighting systems
- Emergency and safety systems

Pinnacle Electric offers excellent opportunities for both apprentices looking to develop their skills and experienced journeymen seeking challenging commercial projects.

Contact: Glenn Robinson at grobinson@pinnacleelectric.ca

CSD Mechanical

Mechanical Systems & HVAC

CSD Mechanical is seeking skilled tradespeople across multiple mechanical disciplines. This is an excellent opportunity to work on comprehensive building systems in a modern educational facility.

Plumbers

1st year through 4th year apprentices and journeyman plumbers

1st year through 4th year apprentices and journeyman sprinkler fitters

HVAC Sheetmetal Workers

1st year through 4th year apprentices and journeyman HVAC sheetmetal workers

Scope of Work

- Plumbing systems installation and maintenance
- Fire suppression and sprinkler systems
- HVAC ductwork and climate control systems
- Mechanical systems integration

Skills & Assets

Skilled in plumbing and mechanical trades, self-motivated, efficient and diligent work approach, commitment to quality workmanship.

Contact: Clint Doty at clint@csdmechanical.com

Alister

Concrete Specialists

Alister specializes in concrete work for commercial and institutional projects. The Prince Rupert Middle School requires extensive concrete work for foundations, structural elements, and finishing, creating numerous employment opportunities.

Currently Hiring

- Skilled labor
- Apprentice carpenters
- Pipe layers
- Truck drivers (Class 5 with air endorsement)

Scope of Work

- Foundation and structural concrete
- Excavation support
- Utility infrastructure
- Concrete forming and finishing
- Site preparation
- Reclamation

Contact: For application information, please contact Yellowridge Construction at careers@yellowridge.ca with "PRMS - Alister" in the subject line.

Ebys

Damp Proofing and Roofing

Ebys is a local Prince Rupert company specializing in waterproofing and roofing systems. As a local employer, they prioritize hiring from the community and will use their own workforce for this project.

Scope of Work

- Damp proofing and waterproofing systems
- Commercial roofing installation
- Building envelope protection
- Weather barrier systems

Working with a local company like Ebys offers the advantage of stable, ongoing employment within the community, with potential for continued work on future projects in the region.

Additional Trades Coming Soon

More Opportunities Ahead

The Prince Rupert Middle School project involves numerous additional trades and specialty contractors that have not yet been finalized. As subcontracts are awarded, new job opportunities will become available across various construction disciplines.

These additional trades may include finishing carpentry, painting, flooring, glazing, landscaping, and other specialized work. Each new contractor will bring fresh employment opportunities and career paths.

Stay Informed

Details about these additional contractors and their hiring needs will be announced at the next Job Fair and posted on the Prince Rupert website. We encourage you to check regularly for updates and new opportunities.

If you have skills in trades not yet listed, we still encourage you to submit your resume to Yellowridge Construction. Your information will be forwarded to relevant contractors as they join the project.

☐ Check the Prince Rupert website frequently for job postings and upcoming hiring fair announcements.

Career Paths Available

The Prince Rupert Middle School project offers diverse career entry points, whether you're an experienced professional, a newcomer to the trades, or someone looking to formalize your skills through apprenticeship programs.

Skilled Trades

Carpentry, electrical work, plumbing, heavy equipment operation, ironworking, and specialized mechanical systems. These positions require specific trade qualifications and offer competitive wages.

Apprenticeships

Entry-level roles supported through STEP and BCIB programs. Gain hands-on experience while earning your trade certification under the guidance of experienced journeymen.

Experienced Workers

Opportunities for seasoned professionals and newcomers alike. Supervisory roles, specialized positions, and general labor all contribute to project success.

No matter where you are in your career journey, there's a role for you on this transformative community project.

Real Voices: Workers Building Their Futures
